

Circular Economy in Action

NatureFlex™ - the Facts

32% of all plastic packaging leaks into ecosystems.

This means that by 2050, there could be more plastics than fish in the sea.

[Source: Ellen MacArthur Foundation]

1/3 of all food produced globally is wasted every year.

[Source: Food and Agricultural Organisation of the UN]

NatureFlex™ can be disposed of on the compost heap, along with organic waste to **enhance soil quality.**

NatureFlex™ helps reduce greenhouse gas emissions by diverting organic waste from landfill.

Food waste is responsible for **7%** of greenhouse gas emissions and **20%** of landfill.

[Source: Food and Agricultural Organisation of the UN]

NatureFlex™ provides barrier, heat resistance and conversion friendly properties to **extend shelf life and reduce food waste.**

NatureFlex™ is compatible with other bioplastic materials for compostable laminates

NatureFlex™ is made from **renewable wood pulp.**
