

my eco² blister pak

certified • compostable • safe

my eco² blister pak is the first compostable and plastic-free weekly compliance pack that is sustainable from the beginning to the end. It is made in Europe from renewable materials.

It can be disposed as paper after use or it will disappear in the garden compost without any trace. It does not leave any microplastic behind.

my eco² blister pak comes in various forms; either as a daily dosette or in different weekly packs.

All certificates and further information: www.ecoblister.com
